Terra Natura

DATI TECNICI

Peso specifico:	1,30 kg/lit +/- 30 gr/lit
Viscosità:	Thixotropic
Essiccazione:	al tatto 2 ore, 6 a 8 tra le mani
Temperatura di applicazione:	tra 10 °C e 30 °C
Resa:	da 8 - 10 m ² per 1 litro
Pacchetto:	1 lit e 4 lit
Conservazione:	24 mesi in pacchetti non aperti, stoccaggio min 5 °C
Infiammabilità:	Non infiammabile
S46	In caso di ingestione, contattare immediatamente un medico e mostrargli l'imballaggio e l'etichettatura.
Date:	Segnato sulla confezione.

TECHNICAL DATA

Specific weight:	1,30 kg/lit +/- 3%
Viscosity:	Thixotropic
Drying:	after 2 hours, completely dry after 24 hours at 20°C
Temperature of application:	between 10°C and 30°C
Yield:	8 to 10m ² per 1l
Package:	1 lit and 4 lit
Preservation:	24 month in no open packages, storage min 5°C
Flammability:	Not flammable
S46	If swallowed, immediately contact a doctor and show him the packaging and labeling.
Date:	Marked on the packaging.

Terra Natura è una vernice decorativa a scaglie, che a loro volta danno una finitura da aspetto antico. Per ambienti interni, la vernice si presenta con finiture morbide e scaglie bianche. La Terra Natura diventa completamente lavabile due settimane dopo l'applicazione. È attosica ad indice COV (< 9,59) L/A 200 g/l (2010). Negli appositi sistemi ed impianti può essere usata con NEOPRO Primer A e NEOPRO vernice resistente.

Applicazione: Appicare la Terra Natura sulla superficie liscia, senza polvere. Imperfezioni della superficie possono essere trattate con la stuccatura per i muri NEOPRO. Dopo la stuccatura per i muri NEOPRO, applicare una mano di vernice NEOPRO primer A, debitamente diluita con acqua in rapporto da 1:5 a 1:10, secondo l'assorbimento della superficie. Appicare quindi due mani di vernice resistente NEOPRO consentendo 4 - 5 ore tra una mano e l'altra per la relativa asciugatura. Appicare con un guanto di lana o vernice - spazzola con continui movimenti circolari, in modo da ottenere l'effetto nuvola. Dopo 15 minuti approssimativi, si consiglia di ripassare la superficie finita con un guanto o con la speciale spatola in plastica con cui premere leggermente eventuali scaglie sporgenti. **Colorazione:** La Terra Natura può essere tinteggiata su tintometro in diverse tonalità, come da carta colori NEOLINE.

Terra natura is decorative paint with white flakes which give an antique looking finish suitable for interior environments, it allows you to obtain a dark bright slightly rough and at the same time soft finish because of the white flakes in the paint. Terra natura is washable after approximately three weeks of application, non-flammable and guarantees one good permeability to the watery vapor. These are the characteristics which make Terra natura particularly suitable as an indispensable element of furnishings in ancient style environments such as hotels, public areas, offices...

Methods of application: Preparation of the surface

Fix eventual imperfections with sandpaper and to apply one coat of NEOPRO primer A opportunely diluted with water in relationship 1:5 until 1:10 based on the absorption of the support. Leave to dry min 4 hour. Then apply two coats of NEO high quality acrylic paint opportunely diluted allowing 4 - 5 hours for drying between each coat.

APPLICATION - Apply with a wool glove or paint - brush with continuous circular movements, in way to evidence the cloudy effect. After approximately 15 minutes it is advisable to go back over the finished surface with the glove or special plastic spatula in order slightly press in any flakes which might stick out.
